

# Visual Dialplan

for Asterisk®

Revolutionize dialplan development

**Visual Dialplan** for Asterisk® is revolutionary visual modeling platform that enables Asterisk users to create, maintain and deploy dial plan in an easy, fast, convenient and natural way. Take advantage and comfort of windows user interface with drag and drop capabilities, large component library, use predefined samples (templates) and make your Asterisk dial plan development easy and fun. Simply model, don't code!

*Apstel provides leading-edge tools and solutions to easier Asterisk® usage and adoption*

Whether creating new dialplan, maintaining or upgrading existing dialplan or just testing Asterisk IVR, queues, conferencing, voicemail, recording, TTS, ASR and other capabilities, Visual Dialplan will enable you to visualize your inbound and outbound call flows making your contexts and macros descriptive, and validate your dialplan before deploying it on the Asterisk box.

Visual Dialplan is exclusively developed for Asterisk PBX and supports the latest major Asterisk open source distribution.

## Benefits for Asterisk dialplan developers:

- The fastest and easiest way to build Asterisk dial plan - simply drag, drop and connect dialplan blocks to make company IVR, Call Center queues, inbound and outbound call flows and deploy it to Asterisk server with a single press of a button
- Linux and Asterisk extensions.conf (dial plan) knowledge is not required
- Large component library (over 150 components and 60 functions)
- Automatic dial plan upgrade
- Powerful validation engine
- Support for open source Asterisk, Free PBX, trixbox, PBX In a Flash, Elastix and all other Free PBX based distributions

## Benefits for Asterisk consultants and professionals:

- Easily maintain and manage complex and large dialplans
- Export and share graphical presentation of call flows

## Benefits for Asterisk manager and GUI vendors:

- Enhance your Asterisk based solution by plugging in Visual Dialplan and providing innovative dialplan management solution to your customers
